Assignment Report

On

UI /UX Design (BCA 155)

Submitted to

Samarajya Shrestha

Department of Computer Application

Koshi Saint James College

Itahari-9, Sunsari

For the Approval of the Evaluation Committee

Submitted By

Name: Dipen Lakai Khadka

Roll No.: 5

Date:2083/06/13

ACKNOWLEDGEMENT

I would like to express my heartfelt gratitude to Samarajya Shrestha, my semester teacher, for the invaluable guidance and support provided throughout the preparation of this UI/UX Design project report. Through this project work, I gained practical knowledge of key User Interface (UI) and User Experience (UX) design concepts such as user research, wireframing, prototyping, UI ability principles, visual design, interaction design, information architecture, design systems, and user testing. I also developed hands-on skills in using design tools to translate these theoretical concepts into practical design solutions, which enhanced my creative thinking, problem-solving ability, and design skills. I am sincerely thankful to my Department and institution for providing me with the opportunity to carry out this project work. I would also like to express my appreciation for the continuous encouragement and support provided by my teacher, which has greatly contributed to my learning experience and academic growth. Finally, I would like to thank everyone who directly or indirectly supported me in completing this report successfully

DECLARATION

I hereby declare that the report entitled **A lab Report on UI/UX Design** submitted to the Department of Computer Application, Koshi Saint James College, Itahari is an original piece of practical lab work under the supervision of **Mrs. Samarajya Shrestha**, faculty member in the Department, and is submitted in partial fulfillment of the requirements for the paper UI/UX Design (BCA 155) in the Second Semester for the award of the degree in BACHELOR IN COMPUTER APPLICATIONS(BCA).

I have conducted the experiment and recorded the data contained herein the lab report. All information sources, collaborations, and designs are directly generated by me have been properly acknowledged. This report has not been submitted to any other university or institution.

Name: Dipen Lakai Khadka

Roll No.: 5

Date:

LETTER OF RECOMMENDATION

This is to certify that the laboratory report titled **" UI/UX Design"** has been completed on time and diligently prepared by Dipen Lakai Khadka in the fulfillment of the academic requirements for the Bachelor of Computer Applications (BCA) degree at the Faculty of Humanities and Social Sciences, Tribhuvan University.

Throughout the completion of this report, Dipen khadka has demonstrated lab practical of **UI/UX Design**. The report reflects Dipen Lakai Khadka dedication to academic excellence and ability to effectively apply theoretical knowledge to practical tasks.

I hereby verify that, to the best of my knowledge, the work presented in this lab report is the original and independent work of Dipen Lakai Khadka.

Brainstroming.

project overview

EduNepal (smart campus app) is a centralized web application designed to help university students manage classes, attendance, assignments, examinations, results, notices, library and academic resources in a single platform.

Core idea:

The brainstroming focused on reducing the difficulty caused by scattered academic information and multiple systems. The application brings essential student activities together into one single and organized platform.

Key Areas Indentified:

1. Academic Management.
→ Class schedules and timetables.
→ Attendance tracking.
→ Assignment management.
→ Exam schedules.
→ Results and academic progress.

2. Communication.
→ college notices.
→ Important announcements.
→ Events.
→ Notifications and remainders.

3. Library and Resources.
→ Book search.
→ Book availability.
→ Borrowed and returned books.
→ Due-date informations.
→ Study materials and PDF resources.

4. Student dashboard.
→ pending assignments
→ Atterdance summary
→ upcoming exams.
→ Recent notices
→ Quick acess to important features.

5. User personas.
→ Student profile.
→ Academic information
→ Account setting.

Main problem Identified.

1. Academic Information is scattered across different sources.
2. student may miss important notices and deadlines.
3. Managing class schedules and assignments can be difficult.
4. Attandance and examination information may not be easily accessible.
5. finding library books and study resources can take additional time.

Design Goal.

→ "one platform for managing the complete student academic journey".

User Research.

1. Targeted users - Who are the users?
→ University students: Bachelor's and master's students who are eligible to use the platform to manage their academic activities.
→ Faculty / Teacher : manage classes, attendance, assignments, and academic information.
→ Administrative staff: manage student information, notices, schedule, exams and other services.

2. user problems - What problems do users face?
→ Academic information is scattered across different sources.
→ Students may miss important notices and deadline.
→ Difficulity in managing class assignments and projects.
→ Exam schedules and result are not easily accessible.
→ Finding study materials can take extra time.

3. Goals - What do user want to achieve?
→ Access important academic information from one platform.
→ Quickly check classes and daily schedules.
→ Manage assignments and projects remainders
→ Easily view exam schedules and results.
→ Recieve and read important notices and announcements.
→ Easy access to study materials.

4. User personas.
→ This app user personas represents a typical college student who wants a simple, fast, and centralized platform to manage academic and college-related activities. The student uses the system to check attendance, exam schedules, results, assignments, notices library books without visiting different sources.

Information Architecture

This Edu Nepal app is organized into a simple, role-based structure that allows students to quickly access the information and services they need.

Main information Architecture.

- Edu Nepal App.
  - Dashboard.
    - Overview.
    - Quick Actions.
    - Notifications.
    - Recent Activities.
  - Attendance and fees
    - Attendance overview.
    - subject-wise attendance.
    - Attendance history.
    - Fee details.
    - Pending fees.
    - Payment history.
  - Study material.
    - Assigment/project overview.
    - Notes, PDF, Past Questions, syllabus.
  - Notices
    - Events
    - Announcements
    - Important updates.
  - Exams and Results.
    - Exam schedule
    - Results
    - semester progress
    - Backlogs.
  - Library
    - search books
    - Borrowed/Returned books
    - Semester-wise books
    - Book Availability.

Ideation - problem and solution

problem

Students often have to use different sources to access class schedules, attendance, assignments, exam schedules, results, notices and library information. This makes academic activities difficult to manage and can lead to missed important annoucement

proposed solution

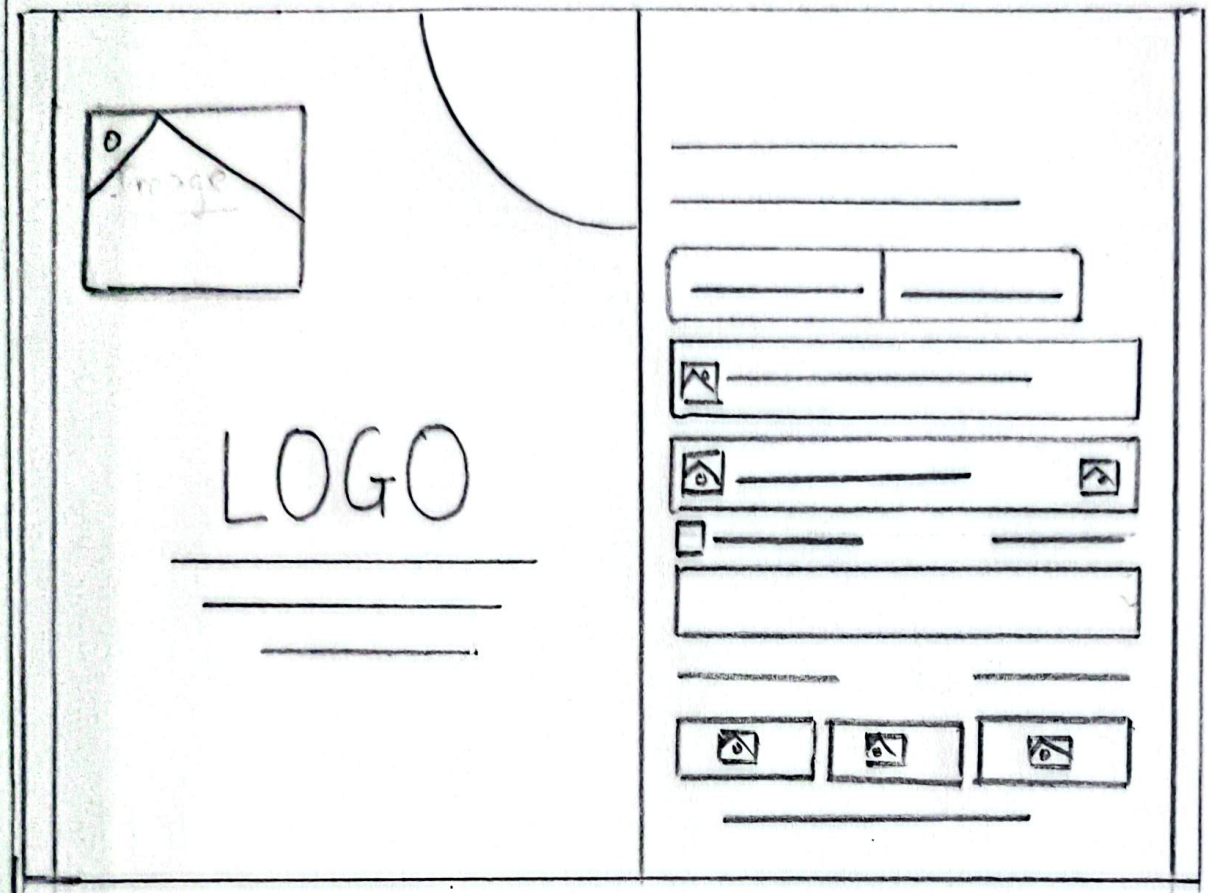

Develop a Smart Campus web app that provide a centralized platform for managing academic activities and accessing college services.

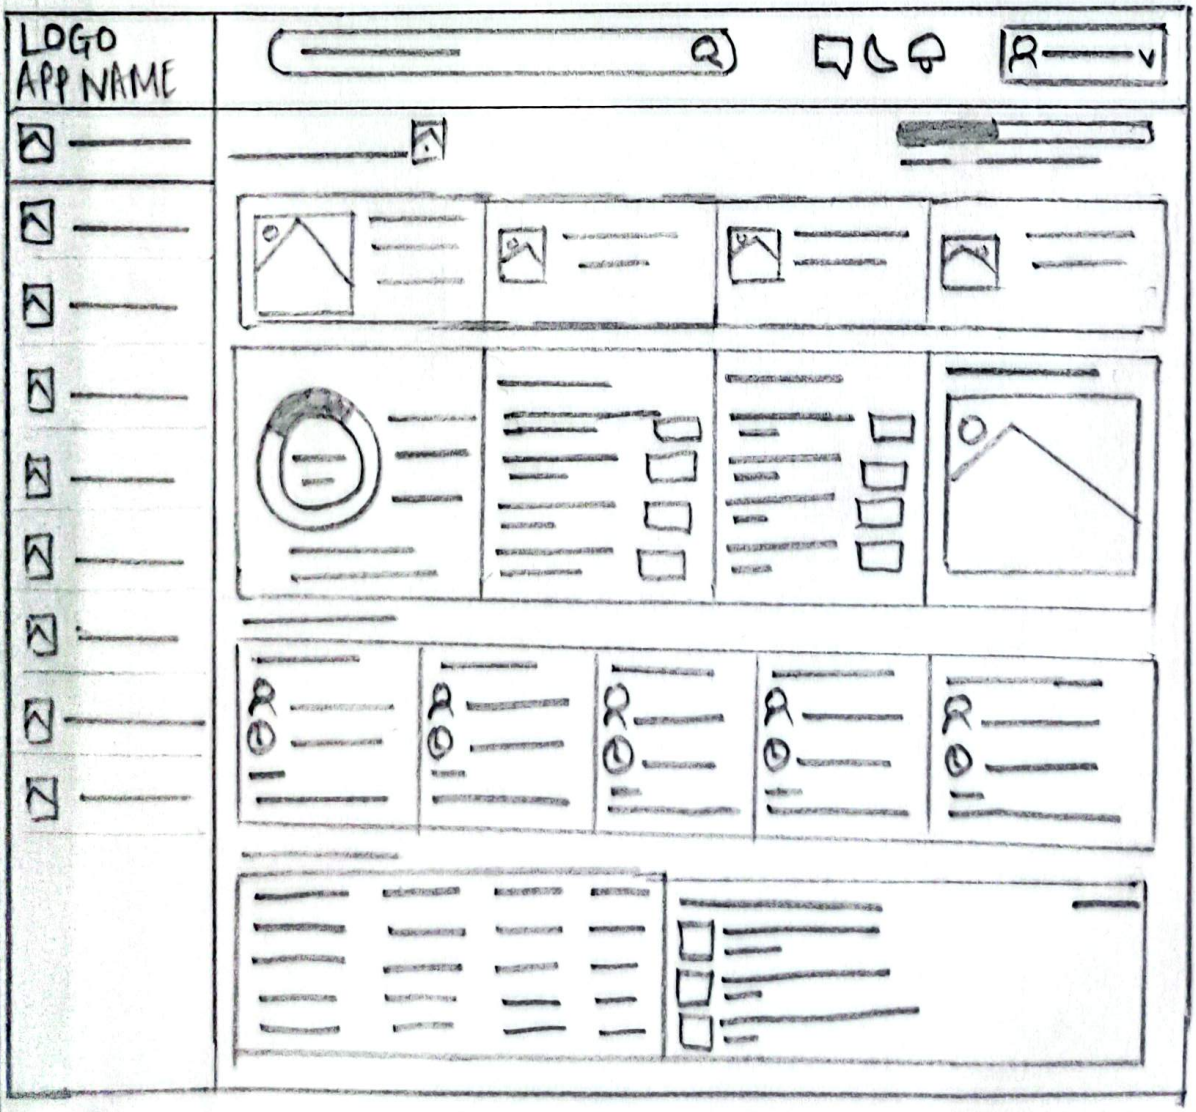

problem	proposed solution
Information is scattered	Centralized dashboard.
Difficult to manage class schedules.	Daily class timetable.
Hard to track attendance.	Attandance summary and history.
Assigment deadlines may be missed.	Assignment tracker and remainders.
Exam information is difficult to find.	Exam schedule and result section.
Important notices can be missed.	Notice board and notifications.
study materials are scattered and takes time to find.	Library search and books tab with proper PDF Resources.

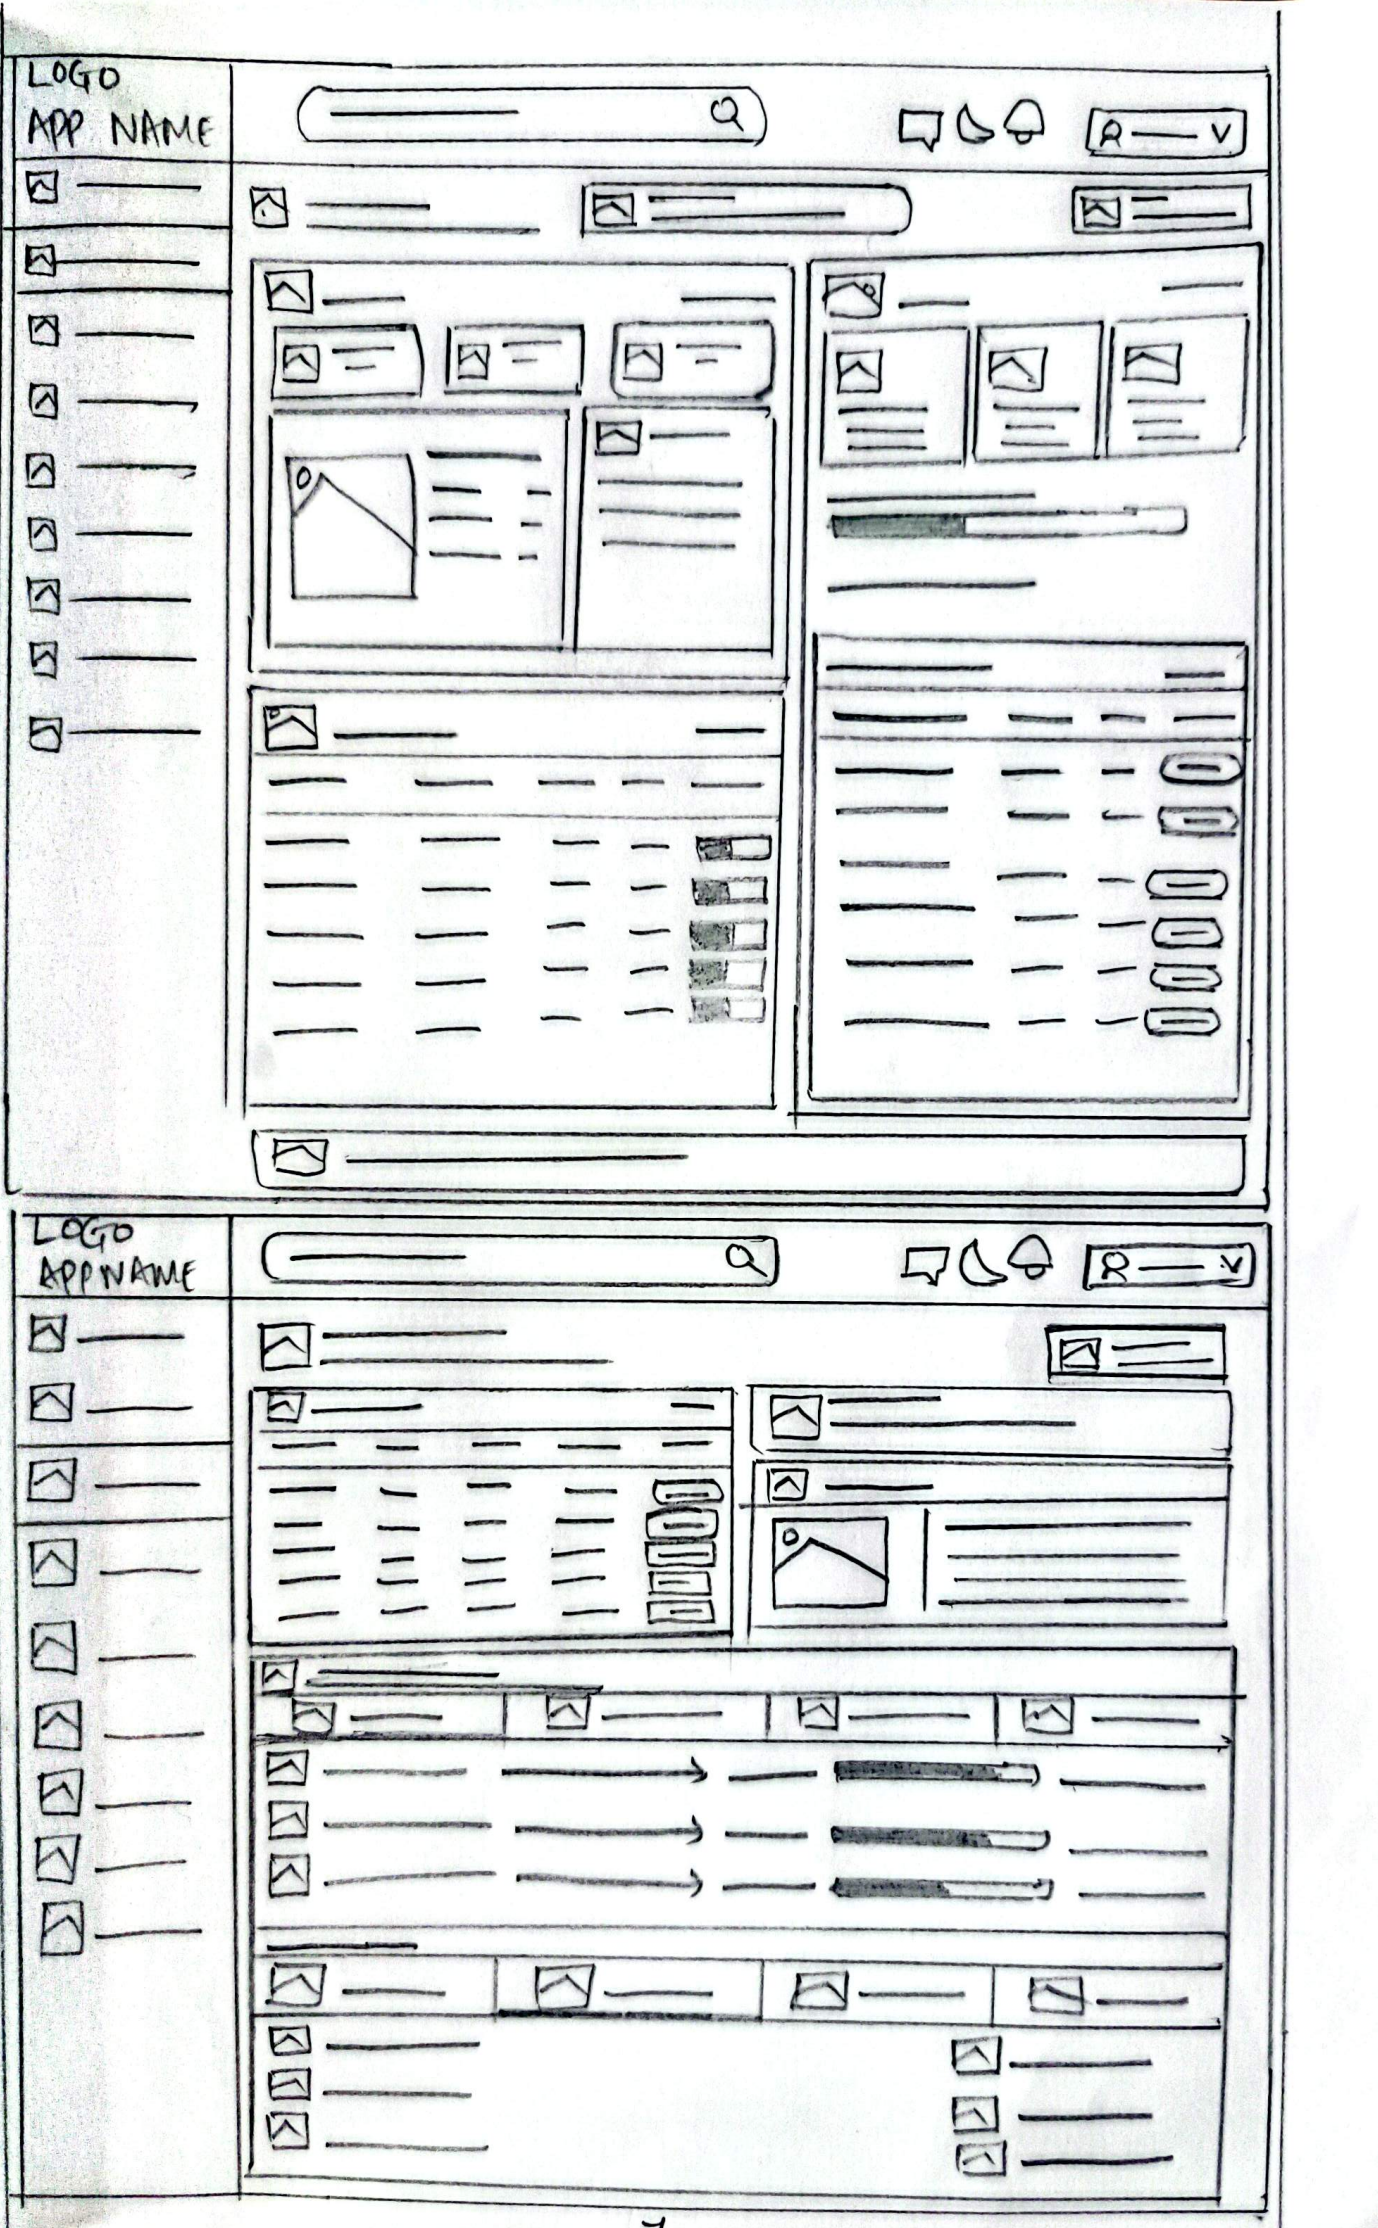

Ideation Goal.

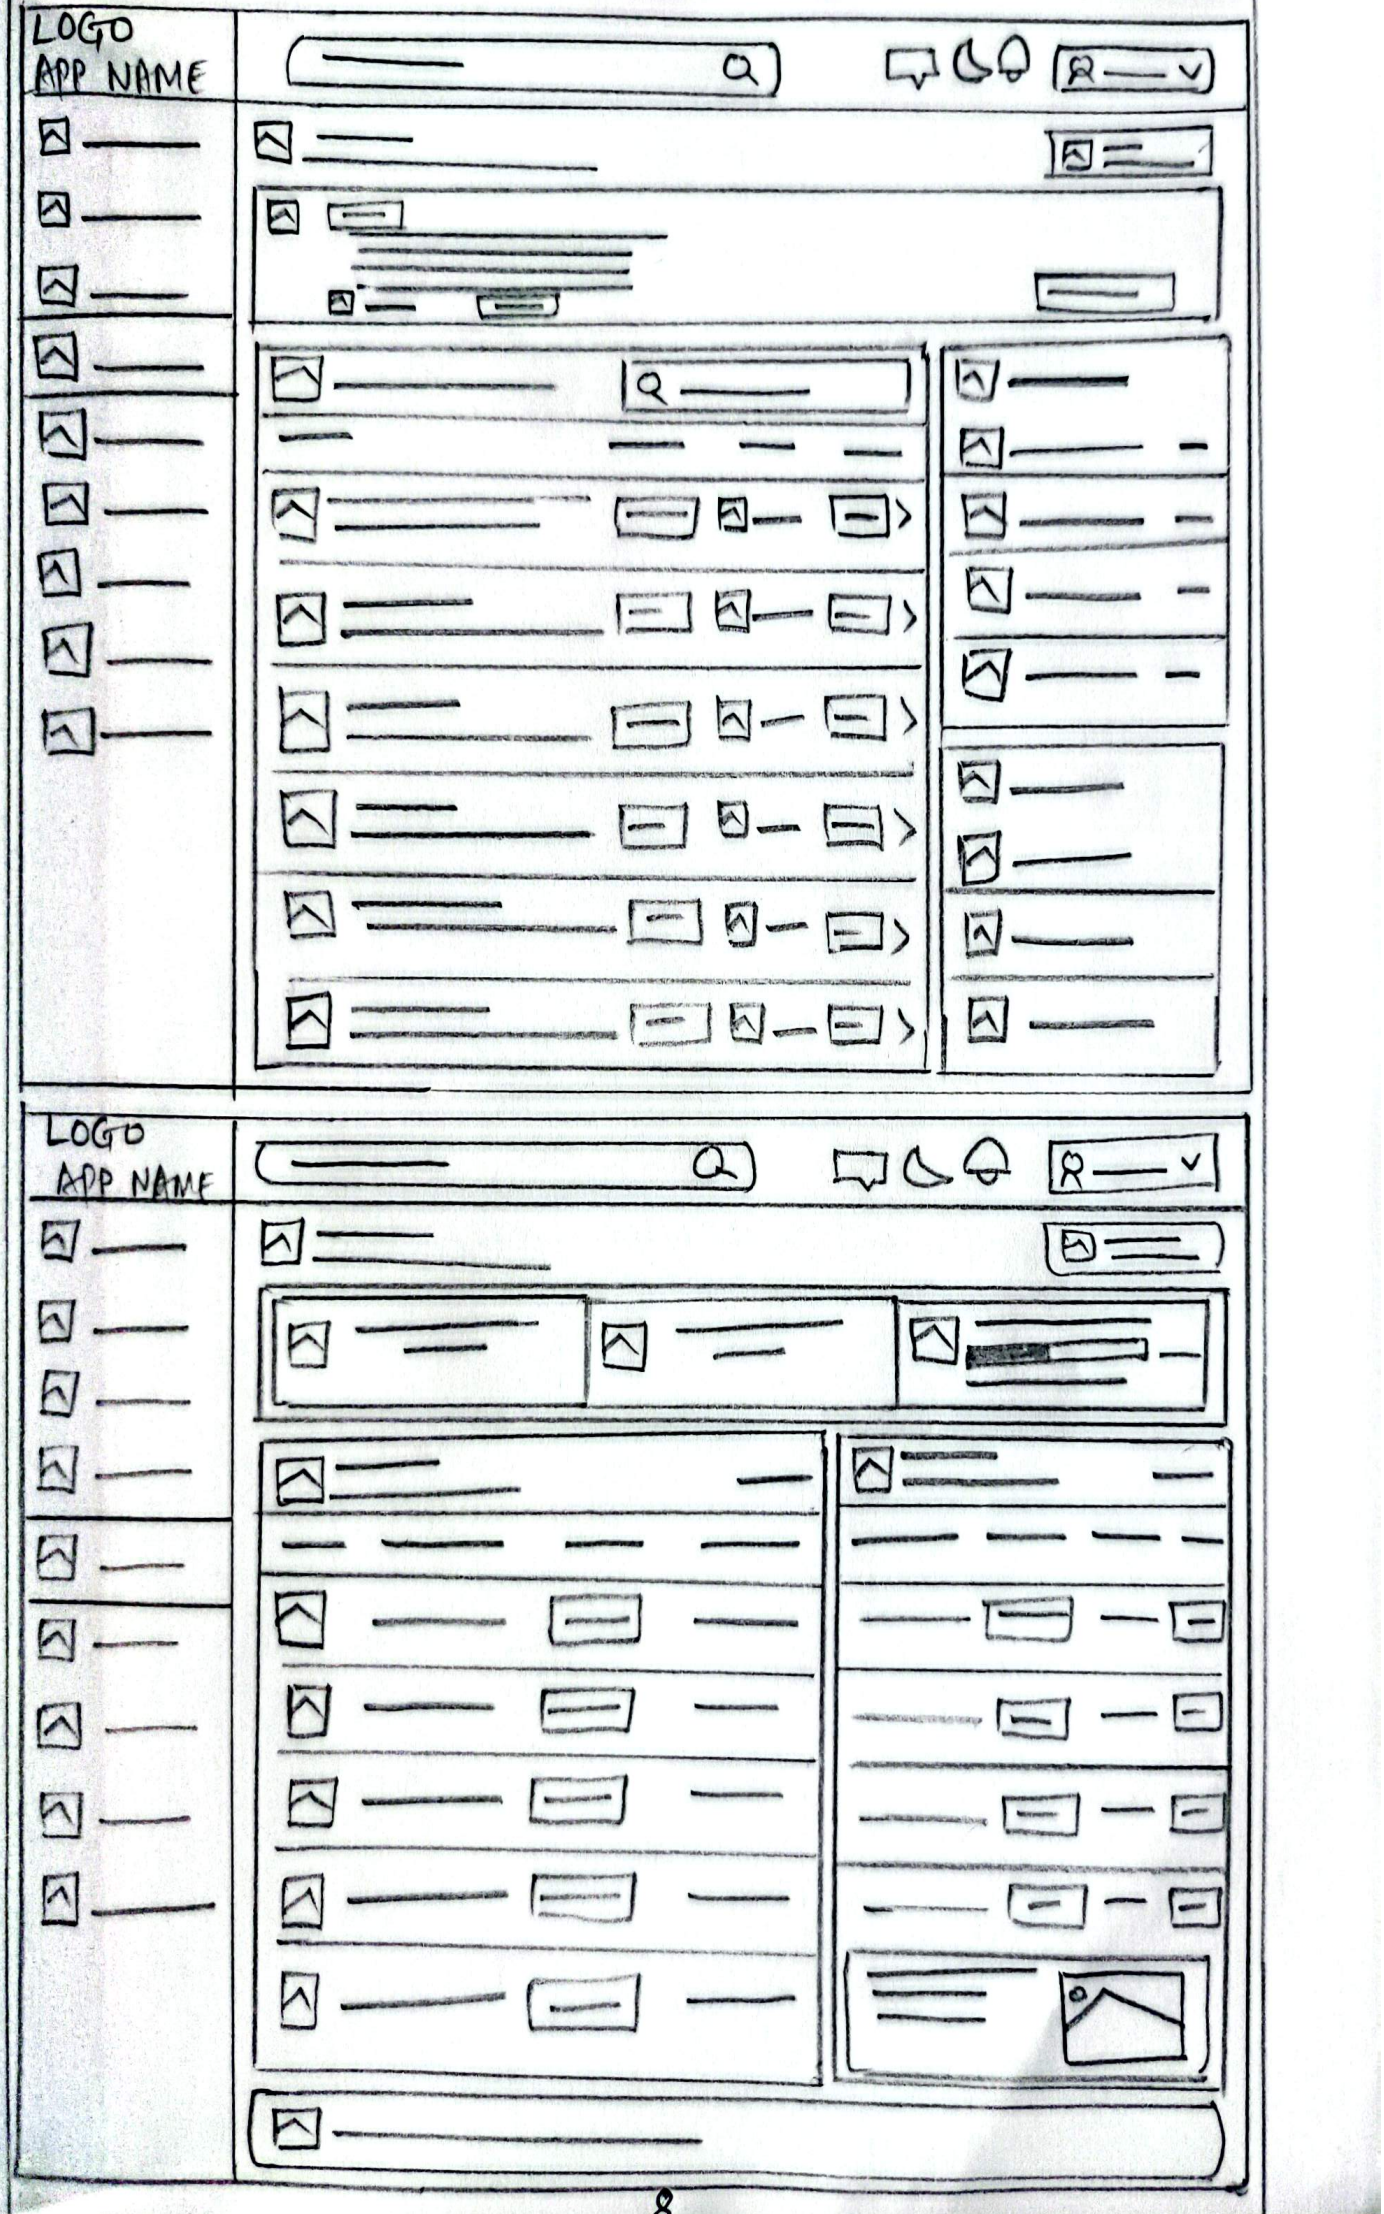

To tranform scattered academic information into one simple organized and accessible smart campus platform. that helps students manage their complete academic journey efficiently.

"A good library is a home for the mind"

Conclusion and future scope.

Conclusion

This EduNepal (smart campus web app) was designed to provide a centralized platform for students to manage their academic activities and access important campus information. The prototype brings essential features, such as class schedules, attendance, assignments, exam schedules, results, notices, library and study resources into one organized system. The prototype demonstrates how a well-structured interface and clear navigation can provide students with a more organized way to manage their academic journey.

future scope.

The prototype can be further developed into a complete campus management system by adding:

1. Teacher and administrator dashboard,
2. online assignment submission and evaluation.
3. online classes and virtual learning.
4. fee and payment managements.
5. Mobile application integration.
6. Integration with the college's existing database.
